Setting Up Project Folders for Maya

CMPU/ART/FILM/MEDS 379 computer Animation

Start Maya. Invoke the menu command Files-Project-Window. Click the “Files-Project” button. Click the “New” button to the right of the “Current Project” slot. Type the name of the project (e.g., Lasseter_John_Project1) into the “Current Project” slot. Click the yellow folder button and browse in the dialogue box to find and select the desktop. Leave the remaining entry fields unchanged and press the “Accept” button. Now carry out your project.
