An introduction to Linux and the Unix Shell

CMPU Seminar

Saturday February 2nd 2019 @ SP309 2-5PM

Linux is the most popular open-source Operating System in the world. The Unix Shell, included with Linux, is a powerful text-based interface to your computer.

In this seminar you'll acquire important skills that will help you with your CMPU courses and future career.

Open to everyone but specially targeted at students currently taking or planning to take CMPU-101 or 102.

Limited to 27 people due to space constraints.
